

Explosion Proof 4/2 Directional Valve, Solenoid Operated, Spool Type, Direct Acting

SD2EX-B4

7/8-14 UNF • Q_{max} 50 l/min (13 GPM) • p_{max} 350 bar (5100 PSI)

Technical Features

- › Valve and solenoid design prevents a surface temperature capable of igniting
- › Solenoid coil in acc. with directive 94/9/EC (ATEX) for explosion-hazard zones
- › Explosion protection for gas, dust, and mining; solutions for all zones
- › Solenoid with encapsulated enclosure
- › Hardened precision parts
- › High flow capacity and high transmitted hydraulic power
- › All ports may be fully pressurised
- › Wide range of manual overrides available
- › Coils interchangeable within Argo-Hytos ATEX/IECEx product line
- › In the standard version, the valve is zinc-coated for 520 h protection acc. to ISO 9227

Technical Data

Valve size / Cartridge cavity		7/8-14 UNF-2A / B4	
Max. flow	l/min (GPM)	50 (13.2)	
Max. operating pressure	bar (PSI)	350 (5080)	
Fluid temperature range	°C (°F)	-30 ... +70 (-22 ... +158)	
Max. switching frequency	1/h	15 000	
Mass with coil	kg (lbs)	1.62 (3.57)	
Technica Data - Explosion-proof Solenoid			
Voltage type		AC 50 / 60 HZ	DC
Available voltages	V	110, 230	12, 24, 48, 110
Available nominal power	W	10	
Supply voltage tolerance	%	AC, DC ± 10	
Duty cycle		S1 (100 % ED)	
Enclosure type acc. to EN 60529		IP 65	
Mass (solenoid only)	kg (lbs)	1.3 (2.87)	
Ambient temperature range			
Temperature class / Nominal power	T4 / 10 W	-30 ... +70 (-22 ... +158)	
	T5 / 10 W	-30 ... +55 (-22 ... +131)	
	T6 / 10 W	-30 ... +45 (-22 ... +113)	

ATEX/IECEx Classification

	Datasheet	Type
General information	GI_0060	Products and operating conditions
Coil types	C_8007	74 EX 18
Valve bodies	In-line mounted	SB_0018
	Sandwich mounted	SB-04(06)_0028
Cavity details / Form tools	SMT_0019	SMT-B4*
Spare parts	SP_8010	

Characteristics measured at v = 32 mm²/s (156 SUS)

Operating limits (p-Q)

Ambient temperature 70 °C (158 °F), Voltage U_n -10 % (24 V DC), Power P_n 10 W

	Model	Direction	Model	Direction
1	2Z11	3→2, 4→1	2X21	3→4, 2→1
1	2Z51	3→4, 2→1	3X21	3→2, 4→1

Pressure drop related to flow rate (Δp-Q)

	Model	Direction	Model	Direction
1	2Z11	3→2	2X21	3→2
1	2Z11	4→1	4X21	4→1
2	2Z51	3→4	3X21	3→4
3	2Z51	2→1	2X21	2→1

For operating limits under conditions other than shown contact the technical support.

Dimensions in millimeters (inches)

Manual Override in millimeters (inches)

In case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override. For alternative manual overrides contact our technical support.

Ordering Code

SD2EX-B4 / / -

Explosion proof 4/2 directional valve, solenoid operated, spool type, direct acting 7/8-14 UNF		Surface treatment B zinc-coated (ZnNi), ISO 9227 (520 h)
High performance	H	Seals No designation NBR
Model / Symbol		Manual override No designation M7 M9 standard detent assembly without manual override
	2211	
	2251	
	2X21	
DC voltage connection box + cable gland		Cable length No designation (only for DC) 3 (AC and DC version) 8 (AC and DC version) without cable 3000 mm 8000 mm
12 V DC / 0.75 A	01200	
24 V DC / 0.39 A	02400	
48 V DC / 0.19 A	04800	
110 V DC / 0.094 A	11000	
AC voltage 50/60 Hz, fix installed cable		Temperature class - solenoid nominal power A4 A6 class T4 - 10 W class T6 (T5) - 10 W
110 V AC / 0.112 A	11050	
230 V AC / 0.052 A	23050	

Besides the shown, commonly used valve versions other special models are available. Contact our technical support for their identification, feasibility and operating limits.

Group I (Mining)

⊕ Ex	ATEX mark of conformity to the 94/9CE directive and to the applicable technical norms
I	Group I for mines
M2	High protection - equipment category
Ex e mb	Type of protection: e - increased safety, mb - encapsulated
I	Gas group (methane)
Mb	Equipment protection level - high level protection for explosive atmosphere

Group II

⊕ Ex	ATEX mark of conformity to the 94/9CE directive and to the applicable technical norms
II 2G	Solenoid for surface plants with gas and vapors environment for zones 1 and 2
II 2D	Solenoid for surface plants with dust environment for zones 21 and 22
Ex e mb	Type of protection: e - increased safety, mb - encapsulated
Ex tb	Type of protection: tb - protection by enclosure
IIB	Equipment suitable for substances (gas) of group IIB
IIIC	Equipment suitable for conductive dust
T6/T4	Temperature class (maximum solenoid surface temperature)
T85/T135	Maximum solenoid surface temperature
Gb	Equipment protection level - high level protection for explosive gas atmosphere
Db	Equipment protection level - high level protection for explosive dust atmosphere

Initial installation

- › The ambient temperature range shall not exceed the temperatures given in chapter 2. The maximum temperature of the medium (generally hydraulic fluid) shall not exceed 70 °C (158 °F).
- › It is the user's duty to ensure free and unhindered heat emission during operation. This means that the solenoid shall neither be covered nor stored immediately adjacent to heat sources (e.g. fan heaters) during operation.
- › The solenoid shall not be subjected to direct sunlight during operation.

Installation notice - installation, mounting, demounting

- › Using the V DC type for temperature class T4 requires a cable with an operating temperature limit of at least +105 °C (221 °F), e.g. LAPP FD Robust. T5 and T6 require a cable with an operating temperature limit of at least +90 °C (194 °F). The fastening torque on the cable gland depends of the used cable and is to be determined by the installing user.
- › When installing the V DC solenoid, the fastening torque of the screws shall be [4 Nm (2.95 lbf.ft)] and for the BARTEC connection box [0.4 Nm (0.30 lbf.ft)].
- › When installing the V DC solenoid, an appropriate cable shoe of size M3 with a crosssectional area of 0.75 mm² with an operating temperature limit of at least +105 °C (221 °F) is to be used.
- › The user has to safeguard each solenoid with a fuse: $I_n \leq 3I_n$, with trigger characteristic "slow blow". (I_n values see Operating Instructions HA 4090 - Table 2). The breaking capacity of the fuse link has to be stronger than the maximum short circuit current at the user's operating area.
- › EX-secured components must be used during mounting in case the fuse and/or the interface are within the EX-range.

Safety notice - Please read carefully

- › In case the solenoid shows any signs of a defect, malfunctioning or external damage (including corrosion), the device must immediately be taken out of operation.
- › Any deposits on the surface of the device shall not obstruct heat emission.
- › To maintain legibility of the data plate, the solenoid must not be coated.

**Caution**

- › Always disconnect the solenoid from the power supply before any maintenance or other work on it.
- › Always exchange the complete solenoid. Do not try to repair the solenoid.
- › Under no circumstances shall any changes be made to the solenoid or the connecting cable.
- › Never operate the solenoid when disconnected from the valve body.
- › Demount the solenoid only in secure areas (not in EX-areas). If this is not possible, the solenoid must cool off for at least 10 minutes.
